

# 9100:2018 Internal Auditor Training

## Background

The 9100:2018 Internal Auditor Training is a comprehensive two-day course designed to equip participants with the skills and knowledge necessary to conduct effective internal audits in accordance with the AS9100:2018 standard. This training focuses on the unique quality management requirements within the aerospace industry, emphasizing compliance, continual improvement, and alignment with global standards. Participants will gain a thorough understanding of the AS9100:2018 requirements, audit principles, and practical techniques to ensure their organizations meet industry and regulatory expectations.

## Learning Objectives

By the end of this course, participants will be able to:

- Understand the structure, purpose, and requirements of the AS9100:2018 standard.
- Recognize the unique features of aerospace quality management systems and their integration with organizational processes.
- Develop effective audit plans, including scope, criteria, and objectives.
- Conduct audits systematically using best practices to collect and evaluate evidence.
- Classify and document audit findings, including nonconformities, and recommend corrective actions.
- Apply risk-based thinking to identify and manage opportunities for improvement.
- Utilize tools such as process approaches, risk assessments, and documentation techniques to ensure audit effectiveness.

## Agenda

1. IAGQ Structure
2. High Level Structure
3. 9100 Clauses
4. Understanding 9100 Requirements
5. Audit Planning and Preparation
6. Practical Auditing Session
