

# 9110:2016 Internal Auditor Training

## Background

The 9110 Internal Auditor Training is a comprehensive program designed to prepare participants to conduct effective internal audits in line with the EN9110:2018 standard, focusing on aviation maintenance organizations. This training emphasizes understanding the unique requirements of the aerospace industry, including operational safety, regulatory compliance, and quality management. Participants will develop the skills to assess compliance, identify nonconformities, and support continual improvement in aviation maintenance environments.

## Learning Objectives

By the end of this course, participants will be able to:

- Understand the structure and requirements of EN9110:2018 and its alignment with the AS9100 series.
- Apply audit principles and techniques in aviation maintenance organizations.
- Plan, conduct, and report audits systematically to assess compliance and identify improvement opportunities.
- Address operational risks, including configuration management, product safety, and prevention of counterfeit parts.
- Handle nonconformities and implement corrective actions to enhance organizational processes.
- Utilize tools and templates to streamline audit activities and maintain compliance with industry standards.

## Agenda

1. IAGQ Structure
2. High Level Structure
3. Clause by Clause Breakdown
4. Understanding 9110 Requirements
5. Audit Planning and Preparation
6. Practical Auditing Session

## Additional Information

- 2 Days
